

Enhancements

to your natural gas system in Mount Prospect

Investing in Illinois: A Nicor Gas System Improvement Initiative is a multi-year initiative to modernize aging natural gas infrastructure. Nicor Gas, with its contractor KS Energy, has been working to modernize the system that delivers natural gas safely and reliably to your neighborhood and we want to keep you informed of our work.

Our Progress

Nicor Gas, with its contractor KS Energy, has been working to install a new natural gas main in your neighborhood. In addition to installing a new natural gas main, we are working to install new natural gas service lines which will connect each customer's property to the natural gas main. Once the new natural gas main and service lines have been installed and connected, we will begin to retire the old system.

Completing Our Work

Due to considerations for avoiding potentially disruptive construction and associated restoration work during the winter months, we will be temporarily demobilizing our gas main installation crews beginning in December 2022. Nicor Gas, with its contractor KS Energy, will return in the spring of 2023 to complete the installation of the new gas main and the remaining service lines. Prior to the spring, we may work to install service lines at certain properties where we are able to do so with minimal disruption. We are utilizing temporary restoration to ensure that all areas affected by our construction are safe for residents as we work to finish the project.

Restore Landscaping & Paving

We understand that you value the appearance of your property. Permanent restoration will be completed once this project is finished. We apologize for the inconvenience, but please know that we are committed to restoring the street and parkway to the same or better condition than when the project started.

For Your Safety

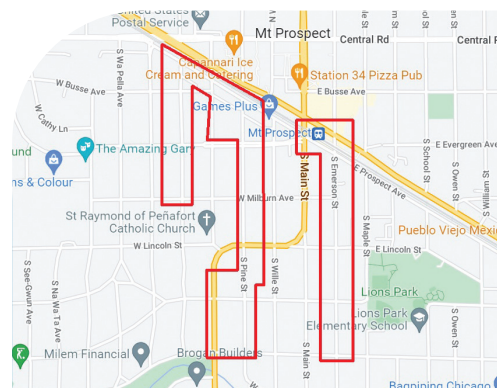

These improvements are part of the Natural Gas Consumer, Safety & Reliability Act and costs are recovered under the Qualified Infrastructure Charge. All Nicor Gas employees and contractors will have Nicor Gas, AGL Resources or Southern Company Gas-issued ID cards and will present them if requested. The Nicor Gas contractor working on this project is KS Energy.

Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide you with safe and reliable natural gas service.

A Nicor Gas system improvement initiative

Areas Affected

- 100 – 110 N. Elmhurst Ave.
- 100 – 119 S. Elmhurst Ave.
- 401 – 522 S. Elmhurst Road
