

For more than 160 years, Nicor Gas has been serving customers with clean, safe, reliable and affordable natural gas.

Nick Renne, Distribution Mechanic, Dixon, IL

Nicor Gas delivers. It's a fact.

We provide service our customers can rely on.

More than 70% of Illinois households use natural gas for their heating needs.* Even during certain extreme weather events that may cause electricity outages, natural gas delivers. We are proud to continually make investments to ensure our system provides the needed heat and warmth – every day, around the clock.

We are committed to affordability.

In Illinois, natural gas is often half the cost of electricity** – which is more important now than ever with families facing rising costs for everything. The natural gas that Nicor Gas delivers can be more affordable than other residential energy sources.***

Natural gas helps fuel local economies and promotes job opportunities.

Nearly 2,000 experienced and skilled employees, plus hundreds of diverse contract partner team members, work to build, operate, maintain and inspect the delivery and storage systems and respond to customers' needs, 24 hours a day, seven days a week. We are dedicated to investing in programs and initiatives that enrich our community through our Investing in Illinois Program and state-wide economic development and workforce development programs.

We are a key partner in the clean energy future.

A clean energy future is possible, and Nicor Gas is leading the way with energy solutions. The clean, safe, reliable and affordable natural gas that Nicor Gas delivers to its customers and the infrastructure that support it are foundational to Illinois' clean energy future. Our commitment to sustainability includes working toward net-zero methane and other emissions from operations, delivering customer solutions, enriching communities and investing in innovation. We are proud to partner with Habitat for Humanity to build two Smart Neighborhoods™ in Illinois as part of our commitment to reduce our environmental footprint and help our customers do the same.
