

Enhancements

to your natural gas system in Evanston

Investing in Illinois: A Nicor Gas System Improvement Initiative is a multi-year initiative to modernize aging natural gas infrastructure. Nicor Gas, with its contractors NPL and UMI, has been working to modernize the system that delivers natural gas safely and reliably to your neighborhood and we want to keep you informed of our work.

Our Progress

Nicor Gas, with its contractor NPL, has completed the installation of a new natural gas main in your neighborhood as well as new natural gas service lines which connect each customer's property to the natural gas main. Now that the new natural gas service lines have been installed and the new system is connected, we will begin to retire the old system.

Completing Our Work

As we work to retire the old system, Nicor Gas, with its contractor NPL, will be performing a limited number of excavations along Brummel Street to access specific segments of natural gas main as needed. We are utilizing temporary restoration to ensure that all areas affected during the retirement process are safe for residents as we work to finish the project.

Restore Landscaping & Paving

We understand that you value the appearance of your property. Permanent restoration will be completed once this project is finished. We apologize for the inconvenience, but please know that we are committed to restoring the street and parkway to the same or better condition than when the project started. **We anticipate this work to begin the week of July 5, 2022 and conclude the week of August 5, 2022, followed by permanent landscaping and paving restoration.**

For Your Safety

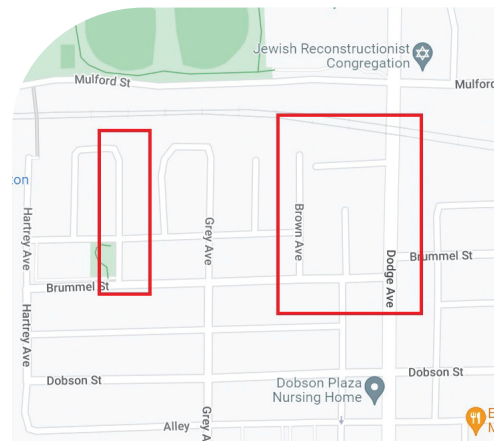

These improvements are part of the Natural Gas Consumer, Safety & Reliability Act and costs are recovered under the Qualified Infrastructure Charge. All Nicor Gas employees and contractors will have Nicor Gas, AGL Resources or Southern Company Gas-issued ID cards and will present them if requested. The Nicor Gas contractors working on this project are NPL and UMI.

Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide you with safe and reliable natural gas service.
