EASY WAYS TO SAVE AT HOME

Try out a new tip each day – you'll be surprised at how easy it is to save!

- Check your dryer vent to be sure it is not blocked. This will save energy and may prevent a fire.
- Close fireplace dampers when not in use; this will prevent air from entering and escaping your home.
- Set your water heater to 120 degrees.
- Take shorter showers; ENERGY STAR® recommends 5-7 minute showers.
- Look for ENERGY STAR® appliances and other products. ENERGY STAR® products meet strict efficiency guidelines set by the U.S. Environmental Protection Agency and the U.S. Department of Energy.
