

Enhancements to your natural gas system in Woodridge

Investing in Illinois: A Nicor Gas System Improvement Initiative is a multi-year initiative to modernize aging natural gas infrastructure. Nicor Gas, with its contractor, Precision Pipeline, LLC, is working to replace a portion of our natural gas transmission system located in your neighborhood and we want to keep you informed of the status of our work.

Our Progress

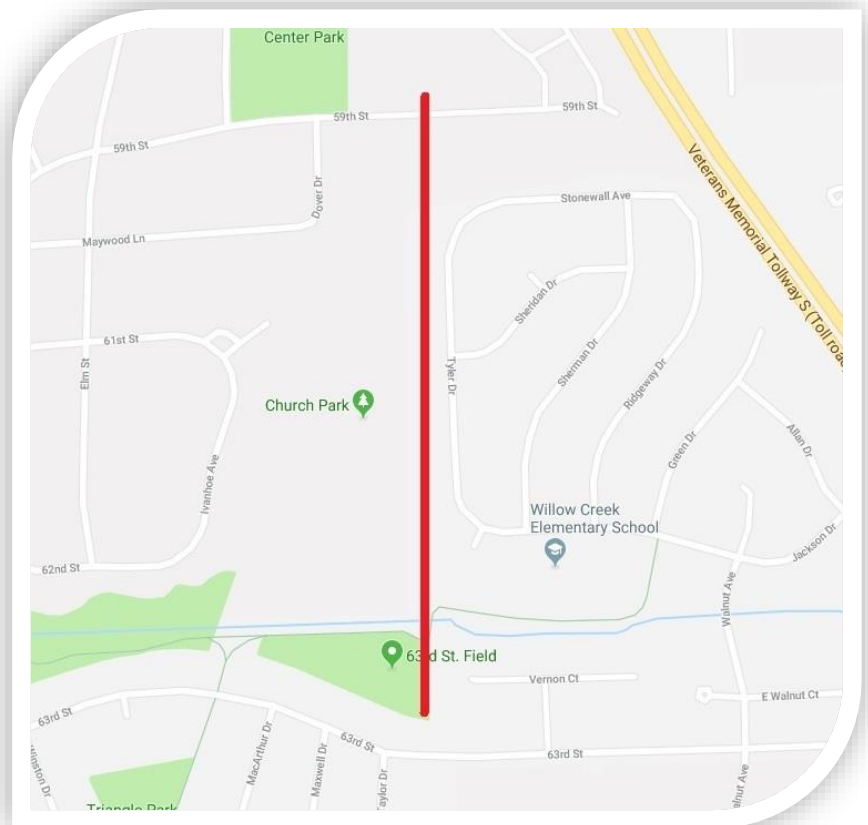

For the last several weeks Nicor Gas with its contractor, Precision Pipeline, LLC, has been preparing the construction area within the Nicor Gas and ComEd rights-of-way beginning north of 59th St. to north of 63rd St. in Woodridge where we will be replacing approximately 2,500 feet of natural gas transmission pipeline.

As part of this transmission pipeline replacement project, we will be operating a boring machine located in the 63rd St. Park parking lot. This machine will be used to safely install the transmission pipeline underground with limited excavation and disturbance to residents.

Completing Our Work

Nicor Gas with its contractor, Precision Pipeline, LLC, will be taking all necessary precautions to ensure the safety of the construction area for residents and visitors of the Woodridge Park District facility. We will install orange safety fencing around the perimeter of the construction site, as well as clearly mark the construction area with appropriate signage and barricades.

As an additional safety measure, we will also install temporary chain link fencing around the perimeter of the 63rd St. Park parking lot, where the boring machine will be located. The Woodridge Park District facilities, athletic fields and bikeways are expected to remain open to the public throughout the project.

Enhancements to your natural gas system in Woodridge

Nicor Gas customers will continue to receive natural gas service during the construction period and this project will not cause service interruptions. Nicor Gas is working with community leaders to reduce the impact construction may have on local roads and other pathways. Once the pipeline construction has been completed, Nicor Gas will restore the areas impacted by our construction with new plants and paving.

For Your Information

These improvements are part of the Natural Gas Consumer, Safety & Reliability Act and costs are recovered under the Qualified Infrastructure Charge.

Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide you with safe and reliable natural gas service.

Areas Affected

This project will be completed within the Nicor Gas/ComEd right-of-way beginning north of 59th St. to north of 63rd St. There will also be construction activity and equipment south of Maple Ave. in preparation of the natural gas transmission line installation.
