

Enhancements to your natural gas system in St. Charles

Safely delivering natural gas is a responsibility we take very seriously. As part of our commitment to construct, operate, maintain, and inspect our natural gas system to ensure safe and reliable service to our more than 2.3 million customers, we are making meaningful investments in modernizing and improving our natural gas infrastructure which include enhancements to portions of our natural gas distribution system.

Natural Gas Pipeline Maintenance

We will soon be performing infrastructure maintenance work at a property located near yours. While your property may not be directly involved in this work, we may need to dig one or a few small holes in the parkway or other areas near your property to safely access our natural gas transmission pipeline.

Nicor Gas customers will continue to receive natural gas service throughout construction and this project is not expected to cause service interruptions.

Once maintenance and replacement work is complete, Nicor Gas will begin restoration of the disturbed construction areas.

Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide you with safe and reliable natural gas service.

Areas Affected

The project will be completed within the Nicor Gas right-of-way.
