Weatherization rebates for multi-family buildings

Available from January 1 - December 31, 2026

Air seal and insulate your way to savings with weatherization rebates for your multi-family property. If your building has drafts or air quality concerns, these improvements can help save money and energy for you and your tenants.

AIR SEALING	ATTIC INSULATION
 <p>Air sealing is the first thing you do to close gaps and holes that cause constant air leaks in your building. This must be done before adding insulation.</p>	 <p>Adding insulation to your attic minimizes heat loss during the winter and prevents heat from entering your building during the summer.</p>
Rebate: \$2 per linear foot	Rebate: Up to \$2.50 per square foot
DOOR SWEEPS	DOOR WEATHERSTRIPPING
 <p>Install door sweeps along the bottom edge of exterior doors to seal the gap between the door and the frame and prevent heating and cooling loss.</p>	 <p>Install door weatherstripping to close the gap between the door and the frame on exterior doors.</p>
Rebate: \$75 per exterior door	Rebate: \$25 per exterior door
DUCT SEALING	
 <p>Duct sealing minimizes the air lost due to leaks, holes and poor connections in your duct work.</p>	
Rebate: \$500 per furnace	

Save money and energy at your multi-family property.

Effective sealing and insulation can:

- Reduce drafts and air leaks, helping improve temperature control to keep your tenants comfortable all year long
- Increase HVAC efficiency and reduce wasted energy
- Lower heating and cooling costs
- Improve overall air quality in your building
- Block insects and unwanted pests from entering your building through gaps and holes
- Reduce noise from the outside
- Achieve a sustainable future by lowering carbon footprint

All work must be completed by a program-approved contractor.

The Nicor Gas Energy Efficiency Program rebate will appear as an instant discount on your final invoice from your contractor.

Rebate eligibility may vary by project.
