

## Rebates for Business Optimization

Specialized energy-saving opportunities for your public or private commercial facility, no capital investment required

Take advantage of specialized rebates designed to cover 100% of project costs on eligible equipment and improvements for your public or private commercial facility from the Nicor Gas Energy Efficiency Program.

Take your building's energy savings to the next level with Business Optimization.

For Business Optimization improvements, eligibility requirements may vary by project and may require pre-approval. Only public or private commercial facilities may apply. Refer to the rebate application for the full terms and conditions.

\*MBTUH = 1,000 British Thermal Units per Hour

Energy  
Efficiency  
Program

Take advantage of savings on qualifying equipment, services and products for your public or private commercial facility.

Follow three simple steps to receive your rebate:

1. Identify energy-saving opportunities

- Talk with your energy advisor or an approved contractor to identify qualifying projects.
- Work with your approved contractor to obtain project pre-approval from the program team.

2. Install products

- Install qualifying products or improvements between January 1, 2020 and December 31, 2020.

3. Start saving right away

- You will receive an instant discount on your project invoice instead of receiving a rebate check.

Find an approved contractor

To qualify for a rebate, all eligible energy-saving equipment and improvements must be installed or provided by a program-approved contractor.

The Nicor Gas Energy Efficiency Program team can assist you with identifying an approved contractor.

For a full list of qualifying products and more ways to save, please contact the Nicor Gas Energy Efficiency Program at **877.886.4239**.
