

# Enhancements

to your natural gas system in Rock Falls and Sterling

Investing in Illinois: A Nicor Gas System Improvement Initiative is a multi-year initiative to modernize aging natural gas infrastructure. Nicor Gas, with its contractor KS Energy, will be modernizing the system that delivers natural gas safely and reliably to your neighborhood and we want to keep you informed of our work.

## Inspect Sewers

Sewer inspections are part of Nicor Gas' safety practices. If your sewer service is not accessible from the street, KS Energy, a Nicor Gas contractor will schedule an appointment to inspect the sewer line from inside your property. There will be no interruption to your natural gas or sewer service during the inspection. Vital information from the inspection will be marked on lawns and sidewalks with spray paint to help avoid any interference with your sewer lines.

## Locate Utilities

During this step, water, sewer, electric and cable utilities will be located and identified with spray painted markings and colored flags. It is important that these markings always remain visible for your safety. Private utility lines, such as sprinkler systems, are your responsibility to identify and mark at the time other utilities are marked.

## Natural Gas Pipeline Replacement

Beginning in October 2018, Nicor Gas, with its contractor KS Energy, will be replacing a 2,650-foot segment of natural gas pipeline, as shown on the map. Where applicable, personal property such as swing sets, gardens, sheds, etc. must be removed from the Nicor

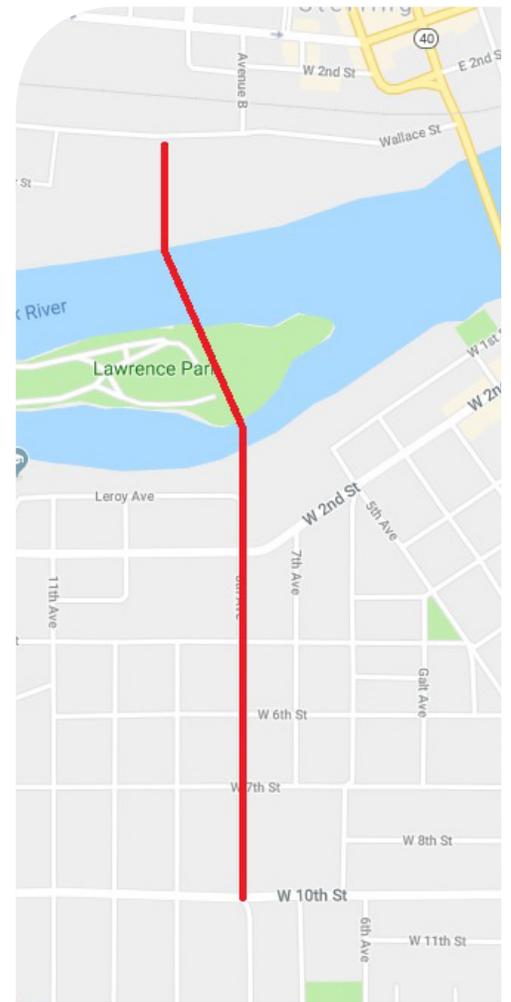

Gas right-of-way before construction begins. Some segments of natural gas main may require placement above ground in the parkway, blocking residential driveway access for a brief period while the pipe is safety tested and prepared for installation.

Preliminary work, including soil sampling, has been completed. Construction is anticipated to conclude by December 2018. Nicor Gas customers will continue to receive natural gas service during the construction period and this project is not expected to cause service interruptions. Nicor Gas is working with community leaders to reduce the impact construction may have on local roads and other pathways.

At the completion of the project, Nicor Gas will restore areas impacted by our construction with new plants and new paving.

## Restore Landscaping & Pavement

We understand that you value the appearance of your property. Nicor Gas will restore landscaping and paving impacted by our construction to the condition in which we found it. Temporary restoration of some areas will be necessary until permanent restoration can be completed.

## For Your Safety

These improvements are part of the Natural Gas Consumer, Safety & Reliability Act and costs are recovered under the Qualified Infrastructure Charge. All Nicor Gas employees and contractors will have Nicor Gas, AGL Resources or Southern Company Gas-issued ID cards and will present them if requested. The Nicor Gas contractor working on this project is KS Energy.

## Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide you with safe and reliable natural gas service.

## Areas Affected

The project will be completed within the Nicor Gas right-of-way and temporary easements beginning north of 10th Street to south of Wallace Street.
