

Enhancements

to your natural gas system in Naperville

Investing in Illinois: A Nicor Gas System Improvement Initiative is a multi-year initiative to modernize aging natural gas infrastructure. Nicor Gas, with its contractor NPL, has been modernizing the system that delivers natural gas safely and reliably to your neighborhood and we want to keep you informed of the status of our work.

Our Progress

For the last several weeks Nicor Gas with its contractor, NPL, has been installing new natural gas main in your neighborhood. We have almost completed the installation of the natural gas main and will soon be working on the next phase of this project where we will install a new natural gas service line that connects your property to the natural gas main.

Expected Timeline of Work (Weather Permitting)

- **Week of January 8, 2018** – Main installation will be completed.
- **Week of January 15, 2018** – Main will be lived up with natural gas and service line installations will begin along Prairie Ave.
- **Week of January 22, 2018** – Service line installations will begin along White Oak Drive and Porter Ave. Connections to the new main will begin following the service line installations.
- **Week of January 29, 2018** – Service line installations will begin along Sylvan Circle.
- **February 2018** – Service line installations will begin along Highland Ave. and Columbia, Sleight and Wright Streets.
- **March 2018** – Service line installations will begin along Julian St. and retirement of the old main will follow. Landscaping and paving restoration will begin.

For Your Safety

These improvements are part of the Natural Gas Consumer, Safety & Reliability Act and costs are recovered under the Qualified Infrastructure Charge. All Nicor Gas employees and contractors will have Nicor Gas, AGL Resources or Southern Company Gas-issued ID cards and will present them if requested. The Nicor Gas contractor working on this project is NPL.

Completing Our Work: Appointment Required to Connect the System

Beginning the week of January 15, 2018, Nicor Gas or NPL will contact you to schedule an appointment to install your new natural gas service line and move your meter outside of your home if it is currently inside. Due to current weather conditions, we will not be able to connect your property to the new natural gas main without making an appointment. If you are unable to be home during the time of this work, we ask that you please designate a family member, who is at least 18 years of age, to be present at your home so that NPL can complete this important work.

Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide you with safe and reliable natural gas service.

Areas Affected
