

Enhancements

to your natural gas system in Morris

Investing in Illinois: A Nicor Gas System Improvement Initiative is a multi-year initiative to modernize aging natural gas infrastructure. Nicor Gas, with its contractors NPL and UMI, has been working to modernize the system that delivers natural gas safely and reliably to your neighborhood and we want to keep you informed of the status of our work.

Our Progress

Nicor Gas, with its contractor NPL, has completed the installation of a new natural gas main in your neighborhood. In addition to installing a new natural gas main, we will be working to install new natural gas service lines which will connect each customer's property to the natural gas main. We anticipate this portion of the project will begin the week of Sept. 26, 2022 and be completed by the week of Oct. 24, 2022. Once the new natural gas service lines have been installed, we will complete landscaping and paving restoration and begin to retire the old system.

Completing Our Work

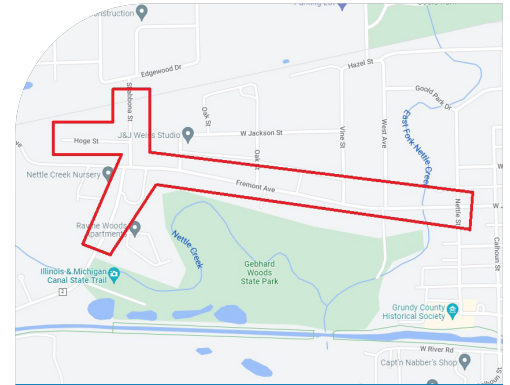

Nicor Gas and our contractors will begin permanent landscaping and paving restoration immediately following the installation of the new natural gas service lines and connection of the new natural gas system. We will also retire the old system. During the retirement process, Nicor Gas, with its contractor NPL, will be performing two small excavations in the neighborhood to access specific segments of natural gas main in order to retire the old system. We anticipate the retirement work to be completed by late 2022 or early 2023. We apologize for the inconvenience, but please know that we are committed to restoring the street and parkway to the same or better condition than when the project started.

For Your Safety

These improvements are part of the Natural Gas Consumer, Safety & Reliability Act and costs are recovered under the Qualified Infrastructure Charge. All Nicor Gas employees and contractors will have Nicor Gas, AGL Resources or Southern Company Gas-issued ID cards and will present them if requested. The Nicor Gas contractors working on this project are NPL and UMI.

Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide you with safe and reliable natural gas service.

Areas Affected

- 505 – 1004 Fremont Ave.
- 1012 – 1059 Hoge St.
- 404 Nettle St.
- 289 – 301 Ottawa St.
- 503 – 539 Shabbona St.
- 405 West Ave.

If your address is not listed, you have received this newsletter to inform you of work being performed in your neighborhood.
