

Enhancements

to our natural gas system in Ogle & DeKalb Counties

InvestingInIllinois
A Nicor Gas system improvement initiative

Safely delivering natural gas is a responsibility we take very seriously. As part of our commitment to construct, operate, maintain and inspect our natural gas system to ensure safe and reliable service to our more than 2.3 million customers, we are making meaningful investments in modernizing and improving our natural gas infrastructure which include enhancements to portions of our natural gas transmission system.

Natural Gas Pipeline Replacement

Beginning in the spring of 2024, Nicor Gas, with its contractor PGI, will be replacing a 171-mile segment of natural gas transmission pipeline, beginning at Meridian Road and continuing east to Pearl Street, as shown on the attached map. Where applicable, personal property such as swing sets, gardens, sheds, etc. must be removed from the Nicor Gas right-of-way before construction begins.

Preliminary work, including soil sampling, has been completed. Construction is anticipated to conclude by fall of 2024. Nicor Gas customers will continue to receive natural gas service during the construction period and this project is not expected to cause service interruptions. Nicor Gas is working with community leaders to reduce the impact construction may have on local roads and other pathways.

At the completion of the construction, Nicor Gas will begin restoration of all impacted areas. Some previously vegetated areas may take multiple growing seasons to reach pre-construction condition. Nicor Gas will contact you to address specific questions about the project.

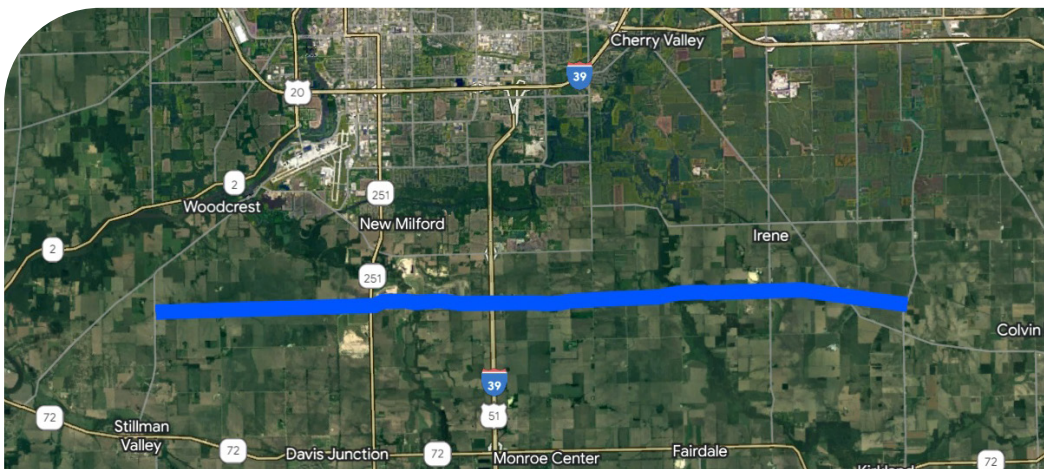

For Your Information

These improvements are part of the Natural Gas Consumer, Safety & Reliability Act and costs are recovered under the Qualified Infrastructure Charge.

Our Commitment

We take great care in implementing construction practices that limit disturbances and we understand your time is valuable. We appreciate your understanding and thank you for allowing us to continue to provide our customers with safe and reliable natural gas service.

Areas Affected

The project will be completed within the Nicor Gas right-of-way and temporary easements.
