Program

Comfort and savings under one roof

The Nicor Gas Energy Efficiency Program can help you save money and energy for your home. Once you start your natural gas service, you will automatically be eligible to explore energy-saving incentives and rebates for equipment and projects.

Free assessments

Our free, professional home assessments can help you understand how you use energy and help you create a plan to start saving. During the visit, we will install free or discounted energy-saving products. You will also receive a detailed report that includes recommended home improvements.

Free products

Our customers can receive free energy- and water-saving products, including high-efficiency showerheads, faucet aerators, weatherstripping, and more, so that you can start saving right away.

Rebates

Get cash rebates for the purchase and installation of eligible energy-efficient products and improvements, including furnaces, boilers, air sealing and insulation.

Loans

We offer financing to help cover the cost of purchasing and installing energy-efficient equipment and improvements. You can easily make loan payments as part of your monthly Nicor Gas bill.

Visit nicorgas.com or call 877.886.4239 to learn more.

Frequently Asked Questions (FAQs)

The Nicor Gas Energy Efficiency Program has several rebates available for customers. Please review the information below **before you purchase any products** in order to understand what rebates you're eligible for, what types of equipment and improvements are eligible and how you can obtain a rebate.

How can I participate?

There are several ways for customers to participate in the Nicor Gas Energy Efficiency Program. Start by visiting our website, nicorgas.com. There you will find information about everything we offer, including rebates, free and discounted products, free energy assessments and more.

What do I need to know before I buy?

Before you invest in new products and technologies, check what products qualify and review the terms and conditions on the rebate applications.

For air sealing and insulation improvements, you must work with a Nicor Gas Energy Efficiency Program approved contractor to be eligible for a rebate. Use the Find a Contractor tool on our website to locate one near you.

When should I install my equipment and apply for my rebate?

Install your qualifying product once you have a Nicor Gas account number and your meter is running. After your qualifying product has been installed, you can apply for a rebate by visiting nicorgas.com/apply.
