Save money and energy at your multi-family property

Available from January 1 - December 31, 2023

No matter where you are in your energy efficiency journey, the Nicor Gas Energy Efficiency Program is here to help you save. From free building assessments to rebates for qualifying equipment and improvements, our team can guide you every step of the way.

Free energy assessments

One of our energy advisors will assess your property and provide you with a customized report detailing opportunities that can help you save money and energy at your property year round. They can also schedule your property for the installation of free energy-saving products and improvements.

Free products and improvements may include:

- Programmable or smart thermostats
- WaterSense® certified showerheads
- WaterSense® certified faucet aerators
- Weatherization services

Rebates for qualifying improvements

Take the next step on your energy efficiency journey and receive rebates for qualifying projects. Whether you are looking to make a small upgrade or invest in long-term improvements to your property, we offer a variety of rebates to help you save money and energy and improve tenant comfort.

Boilers and tune ups

Pipe insulation

Programmable/
smart thermostats

Pool covers

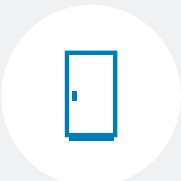

Central plant optimization

If your multi-family building provides shared hot water or space heating to tenants, you may be eligible for rebates to optimize your central plant. This offering provides free and/or low cost services to help lower energy bills for property managers and tenants.

Eligibility requirements vary by project and may require pre-approval.
Get started by receiving a free assessment.

Multi-family weatherization

Rebates are available for attic air sealing and insulation improvements to help increase the comfort of your building and improve overall air quality. If your property has drafts or air quality concerns, weatherization improvements can help save money and energy for you and your tenants.

AIR SEALING	ATTIC INSULATION
 <p>Perform air sealing to close gaps and holes that cause air leaks and qualify for a rebate.</p>	 <p>Add insulation to your attic to minimize heat loss during the winter and prevent heat gain in the summer.</p>
Rebate: \$1 per linear foot	Rebate: Up to \$1.25 per square foot
DOOR SWEEPS	DOOR WEATHERSTRIPPING
 <p>Door sweeps are installed along the bottom edge of exterior doors to seal the gap between the door and the frame and prevent heating and cooling loss.</p>	 <p>Perform air sealing to close gaps and holes that cause air leaks using spray foam or caulking.</p>
Rebate: \$75 per exterior door	Rebate: \$25 per exterior door

Custom incentives

We understand that every building has its own unique opportunities for efficiency. If your energy efficiency project is not covered by one of our existing offerings, we can work with you to customize incentives based on your individual needs.

Pre-approval is required before any equipment is purchased or work begins.
